DIAGNOSTIC IMAGING

Impeccable quality. Patient savings.

Advanced imaging for chronic pain.

Advanced Sequences, Protocols & Assessments

Spine

- 3D Remodeling of Spine CT
- Cervical/Lumbar/Thoracic Spine
- Degenerative Disc Disease/ Disc Herniation
- Flexion/Extension X-rays
- Modic Change Measurement (Lumbar Spine MRI)
- Pfirrmann Grading
- STIR

Head/Brain

- CISS Sequence for Trigeminal Neuralgia
- MRI with Cerebral Spinal Fluid Flow

Other

- Hip
- Pelvis/Sacrum
- Shoulder
- Metal Artifact Reduction Sequence

Other Services

- CT Myelogram
- MRI Arthrogram
- Digital X-ray (walk-ins welcome)
- Imaging Capabilities for Spinal Cord Stimulator patients
- Ultrasound Capabilities (Soft Tissue, DVT)

Expert reads you can trust from our board-certified, subspecialized team of **6 neuroradiologists** and **7 MSK radiologists**

- **Advanced imaging services** with **3T wide-bore MRI available at all locations**
- **Low-dose, 64-slice CT** for superior image quality with significantly lower radiation dosages
- Full-time **contrast coverage, Monday - Friday**
- **Radiologists are available for immediate consultation and questions**
- **Review images and reports anytime** with our web-based portal, Synapse®
- **Same-day and next-day appointments available**

Ability to create **customized protocols and reports** to best inform your treatment decisions
