DIAGNOSTIC IMAGING

Impeccable quality. Patient savings.

Advanced imaging for neurological conditions.

Advanced Sequences and Protocols

- 3D Sequences
- Complete MRI Brain for ARIA
- Deep Resolve Diffusion
- Fast Gray Matter Acquisition T1 Inversion Recovery (FGATIR)
- Magnetization Prepared Rapid Acquisition Gradient Echoes
- Metal Artifact Reduction Sequence
- Motion Correction in 3 Planes
- MRI Brain with Cerebral Spinal Fluid (CSF) Flow
- Susceptibility Weighted Imaging (SWI)

Additional Quantitative Report

- NeuroQuant®

Advanced Services

- CT Angiogram
- MR Angiogram
- MR Venogram

Expert reads you can trust from our board-certified, subspecialized team of **neuroradiologists** and **MSK radiologists**

- Advanced imaging services with **3T wide-bore MRI and Fast Scan technology for optimal patient comfort**, available at all locations
- **Low-dose, 64-slice CT** for superior image quality with significantly lower radiation dosages
- Full-time **contrast coverage**
- **Radiologists are available for immediate consultation and questions**
- **Review images and reports anytime** with our web-based portal, Synapse®
- **Same-day and next-day appointments** available with **evening and weekend hours**

Ability to create **customized protocols and reports** to best inform your treatment decisions
